1.

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 8 recites the limitation "the method of claim 5 or 6". There is insufficient antecedent basis for this limitation in the claim. The claim is being read as reading, "the system of claim 5 or 6".

## Claim Rejections - 35 USC § 102

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1, 2, 4-6 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Larson et al., USPN 2004/0056089.

With regard to claims 1 and 5, Larson discloses a method for providing perimeter security so as to restrict entry to authorized persons (0019), wherein the method comprises steps of (a) issuing to each authorized person a token (0020) displaying or recording a unique set of electronically readable data identifying said authorized person (0030), who can present the token when seeking entry, (b) entering a photograph image of each authorized person into a database (0031), which is maintained in a portable

Art Unit: 2134

computer (0027) having a display (0069), (c) reading the data displayed or recorded by each token presented by a person seeking entry, via an electronic reader (0070), and sending the read data to the computer (0071), (d) the portable or handheld computer (0072) comparing the sent data to the database (0071, 0075, 0076), and displaying the photographic image entered on the database of the person identified by the sent data, via the display (0071).

With regard to claims 2 and 6, Larson discloses that not all enrolled people will have access (0069).

With regard to claims 4 and 8, Larson discloses plural readers (0067, claim 5) which each maintain a replica of the database (0072, 0027).

### Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Fr.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kambiz Zand can be reached on 571-272-3811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
